Commercial Varieties of Avocado and Mango

After twenty years of careful selection it affords us pleasure to offer a complete succession of standard commercial varieties of Avocados furnishing a continuous supply of this the most important food fruit, over a period of ten months of the year.

The following varieties have all fruited here and are prolific bearers, vigorous growing trees, well suited to this climate and soil.

HAWAII. Season June and July, weight $1\frac{1}{2}$ to 2 pounds, pack 28 to 36 to a crate. Shape oblong oval, skin smooth, color greenish purple. Seed medium, fitting tight in cavity, flesh creamy yellow color, quality good. Tree prolific, good grower and as hardy as the Guatamala type.

POLLOCK. Season July and August, weight 2 to 3 pounds, packs 18 to 36 to crate. Shape pear form, skin smooth, color glossy green. Seed medium size, filling tight in cavity, flesh rich golden yellow color, free from fiber, flavor rich and melting. Tree vigorous and prolific. West Indian type.

SIMMONDS. Season August and September, weight $1\frac{1}{2}$ to 2 pounds, packs 28 to 36 to a crate. Shape broadly pear form, skin smooth, color glossy green. Seed medium size, fitting tight in cavity. Flesh rich yellow color, free from fiber. Flavor rich and melting. Tree vigorous and prolific of the West Indian type.

TRAPP. Season September to November, weight 1 to $1\frac{1}{2}$ pounds, packs 28 to 46 to crate. Shape broadly pear form, nearly round. Color glossy green, smooth skin. Seed medium large, fitting tight in cavity. Flesh rich yellow color free from fiber. Flavor rich and nutty. Tree fairly good grower and prolific of the West Indian type.

LULA. Season November to January, weight 1 to $1\frac{1}{2}$ pounds, packs 28 to 46 to a crate. Shape pear form, color glossy green smooth skin. Seed rather large, fitting tight in cavity. Flesh creamy yellow color, free from fiber. Flavor very rich sweet nutty, considered the most delicious of any Avocado yet fruited in this country. Tree healthy, vigorous, upright grower and prolific. Mexican Guatamalan hybrid—hardier than Guatamala type.

COLLINSON. Season December to February, weight 1 to $1\frac{1}{2}$ pounds, packs 28 to 46 to crate. Shape broadly pear form, nearly round. Color glossy green, smooth skin. Seed medium, fitting tight in cavity. Flesh rich yellow color, free from fiber. Flavor rich and nutty. Tree good grower and prolific. West Indian Guatamalan hybrid.

EAGLEROCK. Season January to March, weight 1 to 2 pounds, packs 28 to 46 to crate. Shape nearly round, skin rough pebbled, glossy green color. Seed medium, small, fitting tight in cavity. Flesh creamy yellow color, free from fiber. Flavor rich and nutty. Tree a good grower and prolific bearer of the Guatamalan type.

HADEN MANGO. Season June to August, weight 1 to $1\frac{1}{2}$ pounds, packs 28 to 54 to standard Avacado crate. Shape oblong nearly round. Color rich golden yellow with brilliant crimson scarlet over greater portion of surface. Skin smooth, tough and firm. Flesh golden yellow color. Flavor rich, aromatic and spicy. Seed rather large. Flesh clings to seed with very little fiber. Tree a vigorous grower and as reliable bearer as any mango trees in this climate.

We can furnish trees of any of the varieties described above 12 to 18 inches high growing in boxes at our Nurseries at \$1.00 each, or in carload lots F. O. B. Miami, Florida.

And crated F. O. B. Miami, Florida, at \$1.25 each.

And delivered by truck at Fort Lauderdale, Florida, and Homestead, Florida, in lots of 100 or more at \$1.10 each, and at intermediate points at prices in proportion.

Yours very truly,

GEO. B. CELLON.
